## The latest evolution in slip resistance: BetteAnti-Slip Sense

The new type of slip resistance  
Showers and baths with **BetteAnti-Slip Sense**  
will not be slippery, but safer when you turn on  
the tap.

**Look&Feel**  
It works without changing the even surface  
structure of your shower or bath. When dry,  
there is almost no visible difference to the bath  
or shower.

**Mode of action**  
Contact with water changes the structure of  
the micro-surface. It unfolds its anti-slip effect  
- and reacts to your movements. Stronger than  
static anti-slip surfaces.

**→ Find out more**

**Maximum safety**  
Slip resistant according to rating group C to  
DIN 51097.

**Easy to clean**  
Dirt particles cannot stick to the surface.  
Thanks to **BetteGlaze®**, water droplets roll  
down more easily and you do not require  
abrasive cleaners. A damp cloth and a mild  
detergent are sufficient for the care. This  
saves time and protects the environment

**30 years warranty**  
The surface of your bathroom product remains  
permanently beautiful and safe.

**Flexibility**  
**BetteAnti-Slip Sense** can be combined with all  
our showers and baths in colour white (000).

## Key Products and Services

German bathroom manufacturer, Bette, creates award-winning glazed titanium-steel baths, shower floors and washbasins.

Available in an extensive range of sizes and colours, they are finished in BetteGlaze®; a durable, non-porous, scratch-resistant, and easy to clean surface. Products are available in both gloss and matt finishes, with the opportunity to colour-match ceramic items, such as tiles. Considering renovations, it is also possible to create customised solutions to fit a space perfectly.

Overall, Bette has a product range of over 600 models, a great variety of over 400 colours and more than 25,000,000 possible variants.

### Location Information

Bette has its production site and headquarter in Delbrück, Germany, is present in over 30 countries and sells its products all over the world.

Bette is the first manufacturer on the market to offer and sell baths, shower trays and washbasins made of glazed titanium steel. These products are durable and 100% recyclable. As a result, we offer an extended 30-year guarantee on our enamelled products.

Bette's own fleet of vehicles ensures short delivery times of around 3-4 weeks in Central Europe. For countries outside of Europe these may differ slightly.

## Added value for operators

The BetteGlaze® surface along with the design of the waste/waste cover supports a timesaving cleaning process with very low use of detergents. This is not only an environmental benefit, much more it reduces cost and time for housekeeping and minimizes any disturbance for the guest whilst ensuring high level satisfaction for cleanliness. Our waste solution is designed to reduce the risk of smell or infection.

The BetteGlaze® is highly resilient against traces of use and will deliver a “brand new” impression to the guest even after many years. Renovation circles can be prolonged, especially in the wet area where renovation often goes in line with risk of leakages.

Both benefits above also count for our guest security feature BetteAnti-Slip. It will not rub-off and is extremely easy to clean.

Bette supplies noise reduction solutions offering your guests a quieter user experience while enjoying a Bette product thus increasing their relaxation. In addition this optimizes guest satisfaction for neighbouring rooms too, as it reduces noise disturbance especially late at night or early in the morning.

The stability of our products means less movement in use which results in a longer durability of the sealing joints and therefore a reduced risk of issues caused by leakage (see consequences below).

The Bette solution with its installation support ensures an easy and safe integration during construction. Beside the number of advantages this means for both owner and constructor, it avoids the need of maintenance service which often results in guest disturbance and financial loss for out-of-service status for the affected rooms.

## Bette Baths

- More than 70 different models
- Sizes from 1050 x 650 mm up to 2000 x 1000 mm
- Several anti-slip options available
- Various options from built-in, semi recessed to free-standing
