Madaster

Making impact in
the built
environment

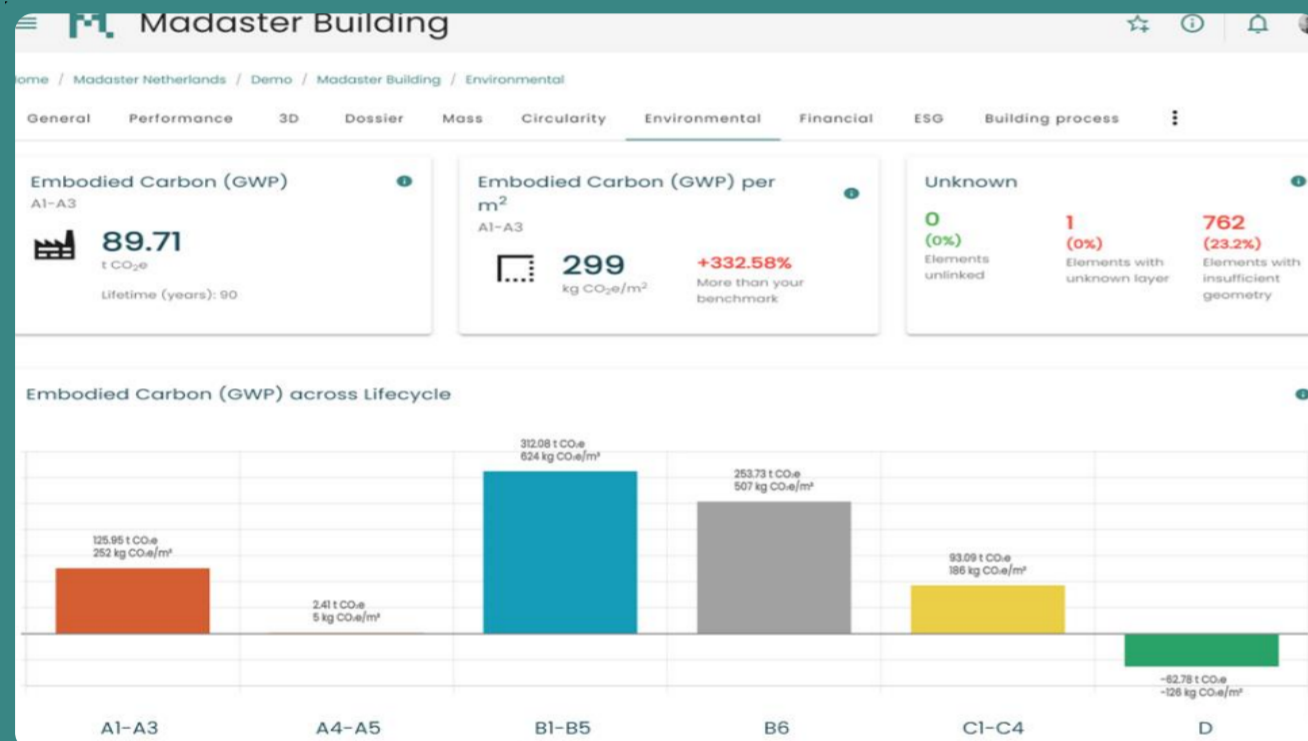

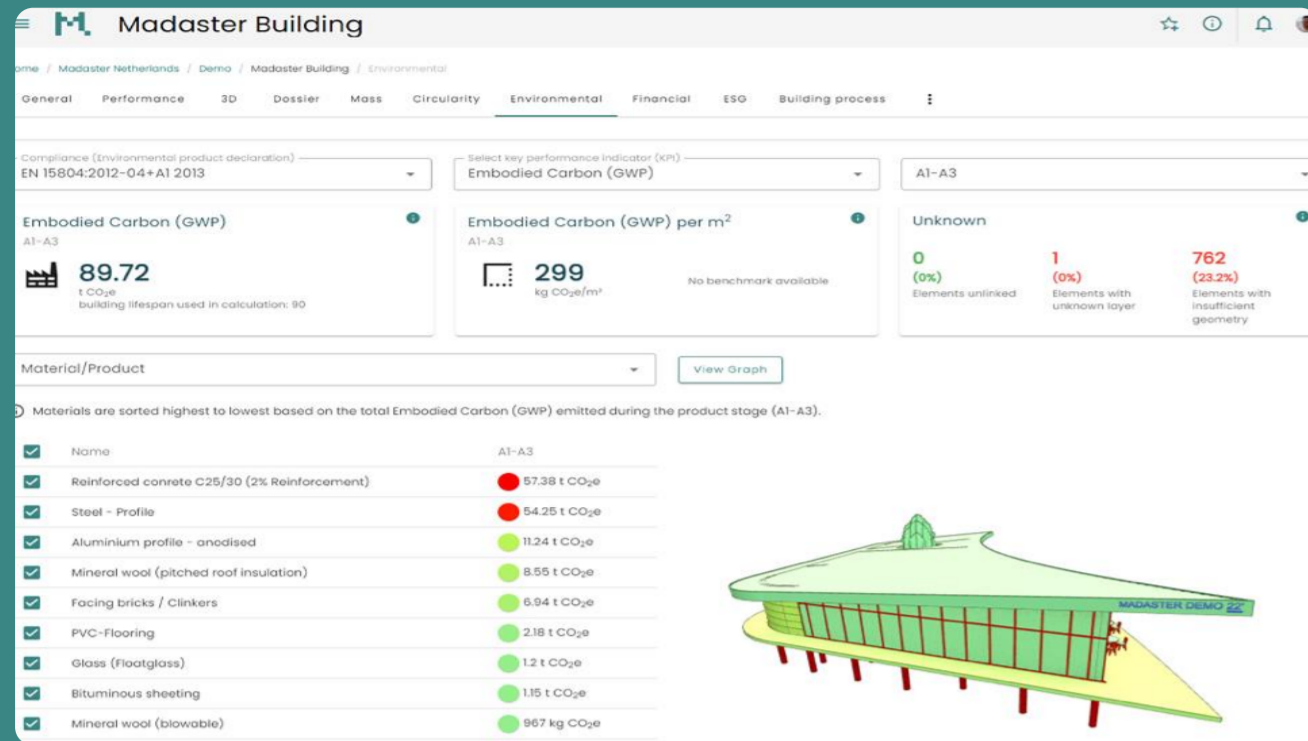

The register for products and materials in the built environment

We started in 2017 to change the industry.

- Active globally with offices on the ground in 7 countries with 40 colleagues
- Fully independent
- A business model based on platform subscriptions only
- >1.000 clients, > 25mln m2 registered
- Supporting a growing range of regulatory and reporting standards
- Connected to >75 product/ EPD databases
- Clients across the entire supply chain: from designer to demolisher, from manufacturer to investor

A leading global platform

- We register products, assets and portfolios in the **built environment**
- The platform offers **passports** and **reports** on a.o. circularity, carbon and stranded assets
- We have prediction models support **rapid mass portfolio registration**
- Madaster has extensive **data solutions**

We enrich, calculate, report and connect data about buildings & infra

Impact on global challenges

- Transition to a **net zero** economy
- From take make waste, to **reuse**
- Using **data** technology

You can't manage what you can't measure

We make **carbon** impact and **reuse** potential tangible:

- Passports (product, building, portfolio & area)
- Environmental performance
- Circularity/ reuse potential

Our new economy needs to scale up... **FAST!**

We support both existing and new building stock:

- Optimise **design & construction** activities
- Reuse construction **waste/** material flows
- **Prediction models** to for regions and clients with limited data
- **Auditable** – reportable – global

The carbon free economy needs to be unleashed

We stimulate growth and innovation with data:

- For **reusable/reused** and **biobased** products & materials
- For circular business models in **construction product manufacturing**
- For passports and **track & trace** solutions

Exchange, learn, share & cooperate

Madaster is honoured and excited to meet you, to:

- Share **experiences** with operations in >10 countries and thousands of clients
- Initiate and shape **demonstration** projects across the globe
- Start a **successful transition** together!
